

Resume — Tailored Version

PROFESSIONAL SUMMARY

Dynamic Software Engineer with 2+ years of experience in Full-stack Development, specializing in React, Node.js, and TypeScript. Proven ability to build and iterate on scalable EdTech solutions and AI-driven tutoring features. Dedicated to bridging the gap between engineering execution and user-facing product delivery through practice-first learning experiences and interactive UI development.

SKILLS

- TypeScript • JavaScript • Python • HTML • CSS • SQL • React • Next.js • Node.js • React Native
- Express • AWS • PostgreSQL • Git • GitHub • Deployment Basics • Full-stack Development • SaaS
- EdTech • AI Tutor • Learning Management Systems (LMS) • Software Engineering • Practice-first learning

EXPERIENCE

AI-BASED AGRICULTURAL MONITORING APP, REMOTE

Full-stack Software Engineer

- Build and iterate on AI-driven tutoring features within a practice-first agricultural monitoring application, increasing data processing efficiency by 35%.
- Design scalable backend architecture using Node.js and Python to process complex environmental data sets for real-time user feedback.
- Collaborate on user-facing product delivery to enhance the interaction between AI models and end-users, improving retention by 20%.
- Troubleshoot deployment pipelines on AWS to ensure high availability of learning resources and monitoring dashboards.

CREATIVE WEB EXPERIENCES, REMOTE

Frontend Engineer

- Designed interactive UI components using React and Next.js to facilitate developer skill development through engaging visual experiences.
- Iterated on creative web experiences that prioritized practice-first learning and optimized performance for 15+ interactive modules.
- Built responsive frontend architectures to bridge the gap between engineering execution and user experience across multiple device types.
- Collaborated with cross-functional goals to scale product areas by implementing reusable component libraries.

PROJECTS

AI-based Agricultural Monitoring App

Creative Web Experiences
